

LABSS Dispute Resolution Enquiry Submission Form

Please refer to the associated Guidance Notes when completing this form.

If you disagree with the technical or procedural interpretation that the Building Standards Authority is adopting in the consideration of a building warrant that you have submitted or will require to submit you may request an interpretation through Local Authority Building Standards Scotland (LABSS).

This can also include situations where you disagree with an interpretation that the Building Standards Authority is adopting for a building warrant related to an alternative design approach that varies from the Technical Handbooks.

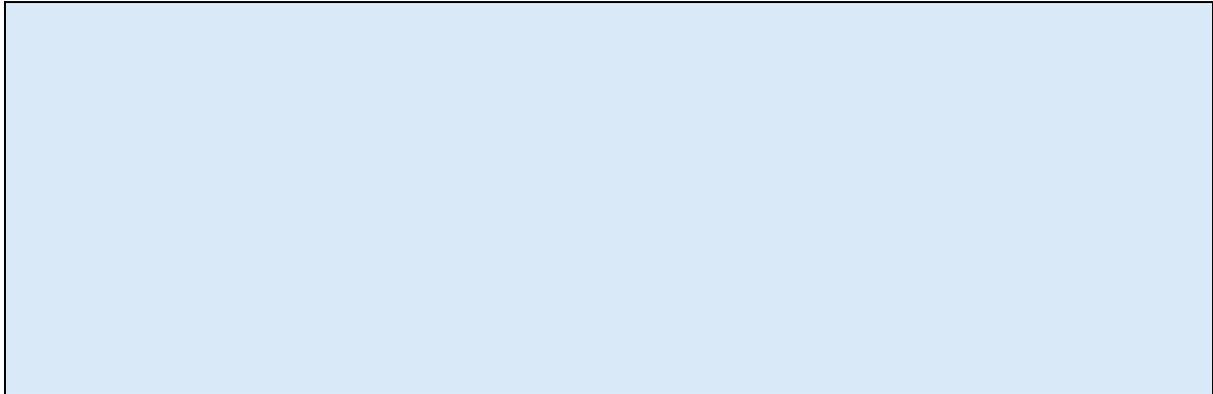

The DRP or similar technical reviews often yield valuable insights, trends, or interpretations from BSD's technical authors that can inform future decisions, however for fairness and accuracy, each DRP case is considered on its own merits.

This request must be submitted to the Building Standards Authority that is considering your proposal, preferably by email.

Applicant/Agent Details			
Name			
E-mail Address			
Case/Site Address			
Building Warrant Ref			
Contact Number		Date	

Query/Request – please tick all that apply	
Query on a Verification Procedural Interpretation	<input type="checkbox"/>
Query on a Verification Technical Interpretation	<input type="checkbox"/>
